

Chemical Industry Council Update

Chemical Industry Council

- **Tom Fannon – Ashland, Inc**
- **Sascha Huecker – Bayer Material Science**
- **Nancy Fazzoni – Dow Chemical**
- **Randy MacAllister – Rhodia**
- **Anja Tambosi – Shell Chemical**
- **AgGateway**
- **CEDI**
- **Mike Rowell – Oracle**
- **Alok Saxena – Elemica**
- **Jim Wilson – Chemical Industry Council Architect**

Activities within OAGi

- **OAGIS X – www.oagi.org**
 - Participation on Architecture & Content Work groups
 - Gap Analysis with Chem eStandards v5.0 to follow
 - Jim Wilson
- **High Tech Warehouse & Transportation work group**
 - Kristen Loesel, Ashland & Jim Wilson –KCX
- **Chemical Industry Webinar**

OAGIS X Roadmap for CIC: Requirements/Mapping

- **Work with Elemica, CEDI, and other interested stakeholders such as Monsanto and Syngenta to:**
 - Collect a representative sample of Chem eStandards messages (actual production messages)
 - Determine what messages, structures, and data elements are used
 - Determine what code list values are used (nice to do, but probably won't happen due to technical and privacy concerns)
 - Determine gaps between what is used in Chem eStandards and what is defined in OAGIS 9/X
 - Map what is used in Chem eStandards to OAGIS 9/X
 - Deliver results to OAGIS X Working Group as chemical and agriculture industry requirements

OAGi's Chem eStandards 5.1

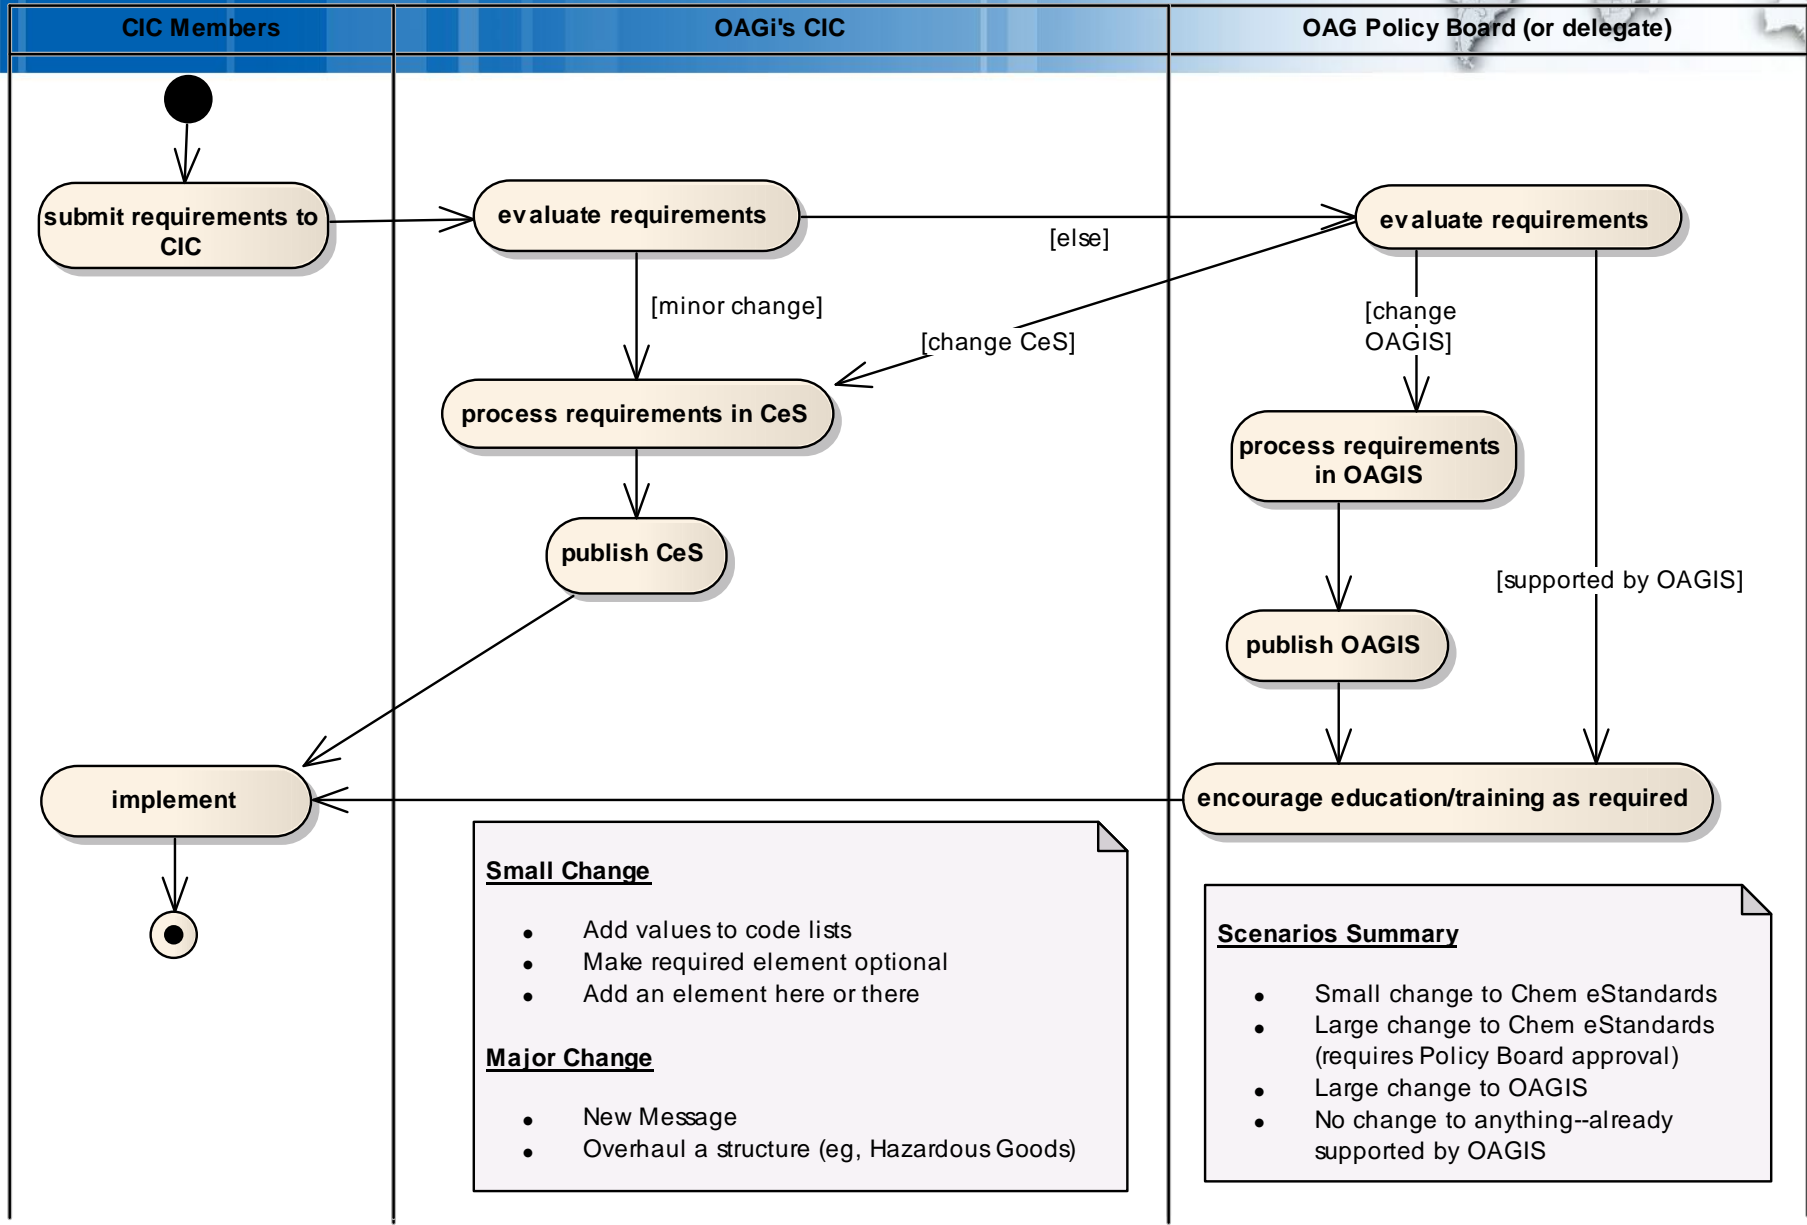

- **OAGi member and collaborative partner AgGateway submitted 180 change requests**
- **The requests have been approved for availability as a release candidate**
- **Support is being added to enable new eBusiness processes for:**
 - European horticulture (e.g., flowers)
 - North American feed, seed, crop nutrient, and crop protection sectors of the agriculture industry

Maintenance Process

- **Chemical Industry Council member submits what they understand to be new Chem eStandards requirements**
- **Four possible process paths:**
 1. Small change made to Chem eStandards
 2. Major change made to Chem eStandards following Policy Board approval
 3. Major change made to OAGIS → education/training
 4. Requirements already supported in OAGIS → education/training

- Small Change**
- Add values to code lists
 - Make required element optional
 - Add an element here or there
- Major Change**
- New Message
 - Overhaul a structure (eg, Hazardous Goods)

- Scenarios Summary**
- Small change to Chem eStandards
 - Large change to Chem eStandards (requires Policy Board approval)
 - Large change to OAGIS
 - No change to anything--already supported by OAGIS

Chemical Industry Input into OAGIS X

- **Jim has received Chem eStandards use data from CEDI and several agriculture companies**
- **Jim anticipates receiving data from Elemica on behalf of their customers in the next week**
- **Jim will analyze the data and produce a report**
- **Jim will share highlights at the CEDI Forum (as advised by Murakami-san)**

Webinar Series

- **The Chemical Industry Council is planning a webinar series addressing the state and future direction of eBusiness in the Chemical Industry**
- **The first event is scheduled for 18 May**
- **This is somewhat of a pilot effort that we think might lead to similar webinars for other councils or OAGi in general**
